Dear Mr. /Mrs.

I am writing to you today, hoping to briefly introduce myself and demonstrate my capabilities and achievements within the ever growing and demanding sector of Software Engineering.

I am finishing my final year of education at Adama Science and Technology University where I have been working towards my software Engineering degree. I expect to graduate in July-8-2017 and therefore am eager to secure an exciting position with a company such as yours for my future.

My course has focused on variety of specialist tools such as Algorithm Analysis, Software engineering, Network Installation and managing Database systems, networking and mobile programming ,Web Design, and Internet Programming. These have assisted me in broadening my knowledge while showing me the diverse side of Software Engineering that I find fascinating.

I have gained further experience aside from my studies, through the summer internship program at Arsi University the time spent there opened my eyes further to the creative challenges required in the industry and how it is forever evolving. I rapidly adapted to the new work culture and team members who became trusted associates throughout my time spent there and I developed two android apps for Arsi University those apps are Arsi University contact Address and Arsi University Student Legislation. This internship solidified my beliefs in choosing this career path for me.

I am fanatical about precision and order, enjoy problem solving and the challenges that it brings with it and believe in team efforts.

I am confident that I would be an appreciated and welcome asset to your company and I hope that you will give me the chance. I am eager to apply my energy, experience, and enthusiasm to work in your company and look forward to hearing from you soon.

Sincerely,  
Dejene Kasa Alemu
